

Week 7 Announcement

Posted Feb 16, 2025 11:07 PM

Hello Students:

Here is my GitHub username: suhash7196. The readings in this module will prepare you to set up your GitHub account, unless you have already set up one. It is important that you set up your GitHub repositories in this module and add me as a collaborator using my GitHub username. This is in preparation for Module Eight, where you will make your first portfolio submission using GitHub. You need to create a new GitHub repository, including a README file, for this class so that you could submit your Game Application (Project Three) in Module Eight.

Project Three

- You will use the same software design template from Projects One and Two to continue developing documentation for your client, The Gaming Room. The software design template is added to each Project, culminating in a completed software design document after Project Three.
- The purpose of using the same template is to have you create a completed software design document that can be used to move the project forward and added to your GitHub Portfolio in Week Eight.

As always, please feel free to reach out (s.sarkar1@snhu.edu) if you have any questions. I am always here to help as much as I can.

Thanks,

Suhash
